UNDERWATER CABLE GLANDS

AISI316	Nickel-plated Brass	IP68	MADE IN ITALY
---------	---------------------	------	---------------

- Made of nickel-plated brass or AISI316 stainless steel
- Available with short, medium or long thread
- IP68 - watertight - for permanent immersion

Available both in the nickel-plated brass version and in the AISI 316 stainless steel version, watertight, the IP68 CASCADE underwater cable glands are designed to allow the passage of underwater cables while guaranteeing maximum tightness against water infiltrations.

Cable diameter from 5 mm to 14 mm.

The nickel-plated brass versions are available both with medium 13 mm thread and with long 19 mm thread.

1/2" connection.
